Cloud at Work®

VIRTUAL PRIVATE HOSTING | HYBRID HOSTING | OFFSITE BACKUP

sage

Sage Hosting Delivered as a SaaS Experience.

Create happier clients and grow your hosting recurring revenue by partnering with Cloud at Work.

Sage hosted on Cloud at Work gives you the efficiency and financial benefits of SaaS, with the confidence that your client's business is running in a secure and stable environment.

Removes the red tape of typical SaaS deployments and allows you to maintain control of your client's environment
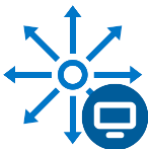

Your client's virtual private network is running in a world class collocated facility that exceeds industry standards of uptime, reliability, security and compliance

Our Sage experts speak your language and help guide you quickly to the source of a problem, so that you can deliver world class support for your clients

Move to the cloud on your client's terms. With Sage and Cloud at Work you get:

Flexibility
With Cloud at Work integrate and connect the Sage certified, 3_{rd} party and proprietary applications you need to keep your client's business running at speed.

Scalability
Cloud at Work's infrastructure and tooling enables you to scale the solution based on your client's needs and growth.

Security
Cloud at Work infrastructure utilizes an end-to-end approach for security, helping protect your client's data.

The Cloud at Work Experience

A Sage Focused Cloud Solution
Patches, Fixes, and Support
We applied the best practices learned from working with thousands of Sage clients and hundreds of Sage partners to deliver a unique cloud experience for Sage users. You support your Sage applications / users, we take care of the rest.

Enterprise-level Cloud Technology
A SaaS Experience, Tailored to Fit Your Client's Organization
With Published Applications there is no "window within a window" using Cloud at Work. It looks, feels, and works in a SaaS fashion. Built to fit your client's needs, there are no limits on integrations or customizations.

Peace of Mind
Industry-standard Uptime, Monitoring and Ongoing Support
With Cloud at Work, we host your client's entire production environment in a stable and secure environment with 24x7x365 monitoring and support. With 99.99% availability and hourly backup snapshots, you can rest assured your client's data will be safe.

Beyond Sage Application Hosting
A Flexible Platform to Improve Your Client's Workflow
While Cloud at Work is focused on providing hosted Sage applications, our technology is capable of providing Virtual Desktops, as well as hosting of any other 3rd party application.

Virtual Private Cloud or Hybrid Secure

Cloud at Work offers complete top of the line cloud services. Our **Virtual Private Cloud** is a 100% Virtual Private environment geared towards organizations who place extreme value on redundancy, security, and availability. Our **Hybrid Secure** offering is specially designed for smaller Sage environments and utilizes SaaS like architecture to deploy semi-dedicated resources. Both offerings are 100% SLA backed solutions that provide the most economical way to securely host your client's Sage software.
