

AutomatedService Add On Solutions

Optimize Your Business Today

Service Scheduler Plus+

Service Scheduler Plus is an advanced scheduling tool that allows you to optimize your tech dispatching while reducing fuel costs and unbillable drive time. This technology calculates "drive time to" and "drive time to next job in tech selection process to give you the ability to find the right tech for the job instantaneously. You now have the ability to decrease windshield time, reduce fuel costs, and maximize billable time with the push of a button.

OSP Mobile -SO Integration

Connect up your Sales – Service workforce with the new OSP Mobile – Sales Order Integration solution. Seamless Sales Order integration provides your techs the sales order line detail to view, edit and automatically generate job transactions.

AutomatedService Add On Solutions

Optimize Your Business Today

KnowledgeSync[®] Sage Alerts & Workflow KnowledgeSync Sage 100 Alerts & Workflow for AutomatedService monitors your ERP data for critical, time-sensitive conditions. For example, Alerts & Workflow identifies past due clients; it sends alerts about them; it can put them on credit hold, and it can even re-send them copies of their overdue invoices.

Alerts to anyone, anytime, anywhere

KnowledgeSync's intelligent alert design lets you notify individuals, groups, and "affected parties," for example, a customer with a delayed shipment and the sales rep for that customer's account.

Form and document delivery

KnowledgeSyc supports both scheduled document delivery like monthly statements, and triggered document delivery, such as sending a PO to a vendor when an inventory item reaches its reorder level.

Report distribution

KnowledgeSync is also your solution for automating the generation and distribution of your analytical reports. Whether it's sales forecasts, inventory analyses, or employee performance reviews, KnowledgeSync supports both scheduled reports and triggered reports.

Workflow automation

Delivering information to your business applications in the form of intelligent workflow, KnowledgeSync can update your business applications with the details of what has happened and what has to happen.

Pre-configured KnowledgeSync events

KnowledgeSync includes collections of pre-configured business events for over 100 popular front-office and backoffice software solutions, with a particular focus in the areas of manufacturing, ERP, CRM, and human resources.

ScanForce is an industry-leading barcode scanning solution for Sage 100 and Sage Intacct. For the best part of two decades, ScanForce has been focused on helping Sage clients manage their warehouse and business operations more effectively through the use of barcodes and mobile devices.

Streamline Operations

Eliminate manual tasks and automate operations using barcode and wireless technology

Improve Productivity

Increase Visibility

Meet Demand

Pick and ship more products, faster and cost effectively to meet customer demand

Reduce Expenses

Reduce inventory carrying costs, lower shipping costs and decrease employee errors
